| A. Whether the Rule of annual leases prescribed in favour of zemindars, is to be considered as <i>ipso facto</i> annulling the engagements entered into last year by which the faith of Government stands pledged to many farmers not being zemindars to continue them under certain condition in the possession of their respective farms, those conditions having been on their parts strictly and completely fulfilled ...                                                                                                                                                                                                                                                                        | In reference to the Government order, prescribing, that in effecting—with the zamindars on annual leases, engagements should be taken from them, Committee solicited the decision of Government on these two points (A & B), as in that case the consequence would be a defalcation in the public revenues ... |                     |

| Jellalore. Resident reported that the distress of the <i>Chuckla</i> is attributed to the great increase of <i>jumma</i> imposed at the—of 1189, the large outstanding balances and ruinous augmentation of <i>halbhungun</i> all are traced to the same source, and the partial relief granted at the—of 1191, was, as asserted by the landholders, a palliation only of the evil, but by no means a radical cure. Committee referred Resident to their orders of 15th December, in which they signified to him their compliance with his recommendation as to the eligibility of granting a decrease of <i>jumma</i> , and concluding the—of the <i>Chuckla</i> under him for the present year ... | 28th Nov.                                                                                                                                                                                                                                                                                                      | 18-19               |
