OPPRESSIONS—Momansing. Opinion of Collector that the—committed by zemindars on the ryots as well as the collusions the latter practice to defraud the former, can only be prevented by him by an unremitting attention to the duties of his station, and by evincing a firm determination of showing no levity to an offender of that stamp, whether a zemindar for extortion or a ryot for collusion, as the foundation of the revenues, if not the existence of the Company, depends on the strictest impartiality and affording an equal protection to all ranks of people ...	13th " 4-7

Opinion of Collector that the subject regarding the introduction of new pottahs is of very great importance, and that the ryots would in general hear of it with an apprehension that no explanation could remove. The nerrickbundi or rates of land may be procured, but the great difficulty still remains unconquerable to any body but a zemindar of ascertaining the quality. Any sezawul or native officer entrusted with the collections disobeying the above order will be dismissed. Circular order issued by Board on the subject	30th " 22
Rajshahye. Settlement of the district for the year 1195. Inability of Collector to suggest any general—to remedy the existing abuses in the collections, &c. It is very easy to discover the inconveniences of any existing system, but very difficult to determine upon a remedy. The people of this country have continually in their mouths the necessity of distinguishing between "Sudder" and "Mofussil" by which they mean, in this instance, the difference between the general knowledge that can reach the governing power compared to the real state of things in the detail	24th June 20

Burdwan. Settlement of the district for the year 1195. Opinion of Collector that it is impossible to establish one general fixed quit—either upon a quantity of the land or upon the specific quality of its produce without totally altering the present system and abolishing the distinction observed amongst the several classes of ryots; but allowing this change can be effected by establishing an average assessment in granting pottahs, it must be calculated upon the amount of the revenue which the ryots now pay, whilst other ryots whose lands not affording similar advantages would be rated proportionately	24th June	23
Sylhet. During the period of the permanent settlement no alteration tending to the increase or decrease of—should take place in any particular pergunnah during that period	15th April	15-18
The general way of collecting the—in the district is by attaching the grain upon the ground until such time as the ryots pay. There is seldom even a fixed demand; the value of the crop and ability to pay being only considered and they are left just a bare subsistence for themselves and families. Proposals of Collector with a view to redress the grievances of the ryots, viz., (1) to reduce the petty zemindars to the footing of ryots, and (3) to incorporate all the pergunnahs in the district into two capital kuondahs under the management of a like number of the most ancient and most respectable zemindars, and (3) to fix the responsibility of transacting the business of the pergunnah upon one instead of two partners in a pergunnah. RESUMPTION OF LANDS—Purneah. Impossibility of at once resuming the lands appropriated by zemindars to their own uses, to the revenue, pointed out by Collector. Dinagapore. The—of the zemindary of Dinagapore have been for the most part received by the zemindar through the medium of naibs or agents sent into every pergunnah and by them from farmers and kulkionadars	11th April	58
Purneah. The—of the district arises solely from the produce of the land, the sale and exportation of which is the source it depends on for making good its payments to Government, and when that fails in any degree the collections must be at a stand. It is in vain to look for money from those who have it not and who want means to raise it, to persist in exacting under such circumstances is to drive the inhabitants to desperation and to convert a temporary evil into a permanent one. Opinion of Collector that in such a case no alteration in the pottahs need be made	13th June	1
RUPPUR AND DERHAUT—Moorsheidabad. Report of Collector that with respect to the reductions of jumma under the heads of—like the arbitrary increase demanded, they appear to have had no better foundation than opinion, the one that the districts were capable of yielding an increase of revenue and the other the reverse of that opinion	16th May	11

Ryots—	
Burdwan. The different classes of—who pay land revenue are the Khoad Kasht or ab-origines, being ryots of inferior caste who pay a house rent and a greater revenue for the lands they cultivate than the Pyekhaust who are ryots of a superior rank that neither pay rent for their dwelling house nor do they pay so high a revenue for their lands; these last are again distinguished by the appellation of Neiz Gong Pyekhaust who cultivate the lands of their own village and the Bazie Gong Pyekhaust pay a still lower rate of revenue. Besides these are the Muttariffa ryots who do not cultivate lands, but have shops and carry on a profession and pay a high house rent to all the above ryots	24th June 23
Sylhet. The—of the district have no hereditary habitation and are not attached to their native home as in other parts of the country. Their dwelling consists of a wretched hovel which together with their families they move at pleasure, and a pergunnah covered with small villages to-day often appears depopulated the next.
